# SMARTSWITCI

## SWITCHES

## **DISTINCTIVE CHARACTERISTICS**

- White monochrome OLED featuring sharp contrast and high resolution with 96 x 64 pixels
- Wide viewing angle of 180° and large 0.92" display with exceptional contrast
- Organic LED technology in display rocker (patent pending)
- Multifunction programmable device: select with rocker, push for activation
- All-in-one solution: replaces multiple switches and displays with one device in a small package
- Easy navigation through structured menus, both forward and reverse and up and down
- Waterprotected and dust tight; conforms to IP64 of IEC60529 Standards on panel surface
- Displays up to 8 lines with 16 characters 5 x 7 each, or 5 lines with 12 characters 7 x 10 each
- Graphics and animations
- Long life OLED with 52,000 hours at 30% illumination
- Panel mount with easy snap-in installation
- Short 14.6mm (.575") behind-panel depth for compact spaces
- Commands and data supplied via serial communications protocol (SPI)
- Stylish black housing design with matte finish complements any application
- High reliability and long mechanical and electrical life of one million actuations minimum

## **APPLICATIONS**

Application Specific Keyboards Aerospace and Military Broadcast Panels Configuration Menus Factory Automation Lighting/Stage/Theater Controls Machine Control/Robotics Medical Process Control Real Time Data Monitoring Security Systems Simulation Test Equipment

### **PRODUCT OVERVIEW**

NKK provides several options for ease of prototyping. The OLED Rocker Kit **IS18WWC1W-K** includes all items that are needed for a quick start of any project. The **IS-DEV Kit-8** is a complete kit for demonstration with preprogrammed option or to be operated with customized graphics.

All items below can also be purchased separately to accomodate customers' needs.

Part Number		Description
IS18WWC1W-K	OLED Rocker Kit: SP3T Switch Rocker (ON) (ON) (ON) Pushbutton Normally OFF Packaged with Charge Pump IS-CHPMP, AT715 Connector Cable, AT097 PCB Connector	
IS18WWC1W	<b>OLED Rocker Switch:</b> SP3T Switch Rocker (ON) (ON) (ON) Pushbutton Normally OFF	
AT715	Connector Cable with (2) JST 12SUR-32S Connectors	
IS-CHPMP	Charge Pump Voltage Booster Input: 2.7~5.5V Output: 16V Meets all OLED power requirements	
AT097	PCB Connector Female SMT Connector JST BM12B-SURS	51111111112-5 
IS-DEV Kit-8	Plug and play Dev Kit Ready to use Pre-programmed for instant demo Easy creation, testing and display for rapid prototype designs

## SWITCH SPECIFICATIONS

Circuit	Single Pole Three Throw (Momentary)						
		Тор	Ċ	Center	B	ottom	
Contact Position	Normal	Down	Normal	Down	Normal	Down	
	OFF	(ON) 9-12	OFF	(ON) 10-12	OFF	(ON) 11-12	
Electrical Capacity (Resistive Load)	3VA maxir	num DC					
Contact Resistance	200 millio	hms maximum					
Insulation Resistance	500 mego	hms minimum	@ 250V DC	2			
Dielectric Strength	250V AC for 1 minute minimum						
Electrostatic Resisting Pressure	15kV minimum						
Mechanical Endurance	1,000,000 operations minimum						
Electrical Endurance	1,000,000 operations minimum						
Operating Force	6.0 Newto	ons at center of	cap				
Total Travel	1.4mm (.0	55") at center	of cap				

## **OLED SPECIFICATIONS**

#### **Characteristics of Display**

Display Device	Single color OLED display
Display Mode	Passive matrix
Pixel Format	96 x 64 pixels (horizontal x vertical)
Pixel Size	0.16mm x 0.177mm (horizontal x vertical)
Interface	Serial (SPI) interface
Color	White/Black (normally White)
Splash & Dust Proof	Conforms to IP64 of IEC60529 standards on panel surface
Operating Temperature Range	–20°C ~ +70°C (–4°F ~ +158°F)
Storage Temperature Range	–25°C ~ +80°C (–13°F ~ +176°F)
Operating Life Time (Display)	52,000 hours (30% brightness); 15,600 hours (100% brightness)

#### Absolute Maximum Ratings (Temperature at 25°C)

Items	Symbols	Ratings
Supply Voltage for Logic/Interface	VDDA	-0.3V to +3.6V
Supply Voltage for Drive	VAH	-0.3V to +18.0V
Input Voltage	Vin	-0.3V to VDDA +0.3V

#### **Recommended Operating Conditions**

**Optical Characteristics** 

ltems	Symbols Minimum		Typical	Maximum		
Supply Voltage for Logic/Interface	VDDA	2.7V	2.8V	2.9V		
Supply Voltage for Drive	VAH	14.5V	15.0V	15.5V		
Input High Level Voltage	VIH	0.75 x VDDA	—	VDDA		
Input Low Level Voltage	VIL	0.0		0.25V x VDDA		

#### **Current Consumption**

(Temperature at 25°C, VDDA = 2.8V, VAI	1=15.0V)
--	----------

Items	Symbols	Min	Typical	Max
All-Pixels-On Mode *Drive System Power Current	I <sub>H1</sub>	_	11.0mA	13.2mA
All-Pixels-On Mode *Logic/IF System Power Current	I <sub>DD1</sub>	_	0.58mA	0.72mA
Sleep Mode **Drive System Power Current	I <sub>H2</sub>	_		10µA
Sleep Mode **Logic/IF System Power Curren		_		10µA
* All pixels shall be turned on wi	th the ma	ximu	m level ar	av scale

\*\* All pixels shall be turned on with the maximum level gray scale \*\* All pixels shall be turned off (while chip is operating)

•				•
Items		Minimum	Typical	Maximum
Brightness		75 cd/m²	100 cd/m <sup>2</sup>	125 cd/m <sup>2</sup>
	(x)	*1	0.310	*1
Chromaticity	(y)	*1	0.320	*1
Contrast		100		

(Temperature at 25°C, Initial Value: depends on initial setting)

\* Chromaticity range is the area of the ellipse. (See Chromaticity Diagram next page) The ellipse passes through points A, B, C and D and designates the center of each side of the quadrangle.

## OLED SMARTSWITCH<sup>TM</sup> Rocker

#### **Chromaticity Diagram**

Point	Chromaticity X	Chromaticity Y
А	0.3441	0.3663
В	0.2983	0.3384
С	0.2799	0.2881
D	0.3257	0.3160

## TIMING SPECIFICATIONS

#### **AC Characteristics**

(Temperature at $-20^{\circ}C \sim +70^{\circ}C$ ), VDDA = 2.8V, VAH = 16V
--

		-		
Items	Symbols	Minimum	Typical	Maximum
Clock Cycle Time	tcycle	100ns		
A0 Setup Time	tswds	65ns		
A0 Hold Time	tswDN	35ns		
XCS Setup Time	tcws	65ns		
XCS Hold Time	tcwh	95ns		
High Level XCS Pulse Width	<b>†</b> CSBH	*10ns

## **DEVELOPMENT TOOLS**

NKK Switches offers a variety of development tools. These tools include software that may be downloaded from www.nkksmartswitch.com.

In addition to standard configurations, NKK can provide custom solutions for the most complex design challenges. Contact factory for information and support regarding your custom applications.

Development Kits provide a full set of tools for designs. The Dev Kits enable rapid prototype designs so that feedback is easily obtained. NKK's Development Kits have been designed to facilitate the creation, testing and displaying of images with software downloaded from www.nkksmartswitch.com. Click on "Download Software."

### PRECAUTIONS FOR HANDLING & STORAGE

#### Handling

- 1. OLED devices are electrostatic sensitive.
- 2. Signal input under conditions not recommended may cause damage to the OLED unit or deterioration of the display. Follow directions regarding supply sequences of power and signal voltages.
- 3. If the OLED panel is broken, avoid touching the contents. Wash off in case of contact to the skin or clothing.
- 4. Limit operating force to 100.0N maximum, as excessive pressure may damage the display.
- 5. Under certain actuation conditions, one side of the rocker and the center switch can both send actuation signals.
- 6. Pixels acquire diminished brightness over time and use, and those most frequently habituated have greater reduction of brightness than those less used. To minimize this difference, operate OLED unit so that all pixels are used as consistently as possible.
- 7. Clean actuator surface with dry cloth. If further cleaning is needed, wipe with dampened cloth using neutral cleanser and dry with clean cloth. Do not use organic solvent.

Incorrect

#### Storage

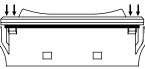

- 1. Store in original container and away from direct sunlight.
- 2. Keep away from static electricity.
- 3. Avoid extreme temperatures, high humidity, gaseous substances, and all forms of chemical contamination.

#### **Panel Mounting**

- Before snapping a switch into the panel, align the gasket evenly under the bezel of the switch.
- When mounting into a panel, apply equal pressure to sides of bezel and insert parallel to the panel.
- After mounting, be sure there are no gaps between switch and panel. Lightly push into panel.
- After installing into panel, do not apply excessive force.
- After panel installation and wiring is completed, do not apply force horizontally or vertically from behind panel.
- Behind the panel, cut area should be squared. If front of panel is painted, do not allow any paint to collect in corners of cutout to prevent level mounting.
- Avoid reinstalling a switch once it has been mounted into panel. This may cause deterioration of ٠ panel sealability.

Gasket position must be even with no gaps beneath bezel Gasket secure and flush against bezel
